Cucumber "Burpless"

This summertime favorite is (as its name suggests) less likely to cause indigestion, stomach pain or heartburn.

This very easy to grow veggie averages 9-10" long and 1½-2½" in diameter and is generally dark green, long and straight.

Burpless Cukes grow best in full sun and must be planted after the danger of frost has passed.

Harvest Instructions

They should be picked (1-1½" in diameter and less than 10" long) by turning the cucumber parallel to the vine and snapping with a quick snap in order to prevent vine damage.

Harvest in the morning when cucumbers are more crisp.

Health Benefits

Contains Vitamins A, B and C

Source of Fiber

Rich in Potassium & Magnesium
