## Greenery- 'Ipomea'

Ipomoea, commonly referred to as Sweet Potato Vine, is a tender perennial and a greenery favorite. Ipomoea produces a variety of boldly colored foliage, ranging from green, variegated and deepest, darkest purple, nearing black. Its colors will come to life through early Spring, Summer and Fall, right up until the first frost. Ipomoea is desired most for its vivid foliage, rapid vigorous growth, heat tolerance, and trailing/vining growth habit for landscape, beds, baskets and containers. Ipomoea is great for early Spring through Fall and Winter in mild climates with vibrant colors to brighten up any container or landscape. They mound to about 6-12" then spread, vine and climb nearly as far as you will let them! Ipomoea prefers full sun but can tolerate some shade. It grows best in fertile, well drained soil.

Ipomoea is available in: Marguerite, bright chartreuse, heart shaped leaves. Blackie, deep purple, nearly black five-lobed leaves. Tricolor, light green sharply lobed leaves with the edges tipped in shades of deep pink and cream.

**Plant it Here!**

- Border
- Landscape
- Baskets
- Focal Point
- Container
- Mass Planting
- Woodland Edge

**Extra! Extra!**

- ◆ Looks great in containers, beds, along borders and in mass plantings.
- ◆ Adds rich color to any mixed plantings
