## MUM - 'DAWN'

Chrysanthemum is from the Greek, chryso (gold) and anthos (flower). The most popular flower form is the "decorative," which is so packed with long, broad petals that you can hardly see its center.

Dawn is an alluring decorative with brilliant yellow flowers. This charmer will bring a burst of sunny color and warmth to your fall beds. They are an easy to grow perennial that prefer to be planted in an area that receives full sun, but most can get by with a half day of direct sunshine. For best growth, plant your fall mums in fertile well drained soil. Plant at least 6 weeks before a heavy frost to establish itself, therefore increasing its chances of returning the next year! These beauties will grow 18-24" tall, full and bushy, so they should be planted 18-24" apart. Color from late Summer through the Fall. Having good circulation between the plants will help reduce the chance of powdery mildew on your plants.

### Plant it Here!

Borders  
Landscape  
Containers  
Ground Cover  
Mass Planting  
Anywhere you want intense color!!

### Extra Extra!
