MUM - 'Darlene Purple'

Chrysanthemum is from the Greek words, chrysos (gold) and anthoas (flower). The most popular Chrysanthemum form is the "decorative garden mum", which is so packed with long, broad petals that you can hardly see its center.

Darlene is a vibrant decorative mum with spectacular purple flowers that resist fading even in the warmest climates. This beauty grows in perfectly purple domes, full of brilliant color.

They are an easy to grow perennial that prefer to be planted in an area that receives full sun, but most can get by with a half day of direct sunshine. For best growth, plant your fall mums in fertile well drained soil.

Plant at least 6 weeks before a heavy frost to establish itself, therefore increasing its chances of returning the next year! These beauties will grow 24-36" tall, full and bushy, so they should be planted 18-24" apart.

"What you need to know
to grow plants
You're proud to show"

Plant it Here!

- Borders
- Landscape
- Containers
- Ground Cover
- Mass Planting
- Anywhere you want a bold display of color!!

Extra! Extra!

- Perfect for Fall landscape
- Intense blooms to embellish borders
- Pair with yellow and orange Mums and for a bright Fall planter
- Mulch plant in the winter for extra protection
- Color through late Summer and Fall
