Mum - 'Cheryl'

Chrysanthemum is from the Greek, chryso (gold) and anthos (flower). The most popular flower form is the "decorative," which is so packed with long, broad petals that you can hardly see its center.

Cheryl is a gorgeous decorative with pink/lavender, two-tone flowers. This eye-catcher grows in perfect pink domes, full of brilliant color. They are an easy to grow perennial that prefer to be planted in an area that receives full sun, but most can get by with a half day of direct sunshine. For best growth, plant your fall mums in fertile well drained soil. Plant at least 6 weeks before a heavy frost to establish itself, therefore increasing its chances of returning the next year! These beauties will grow 24-36" tall, full and bushy, so they should be planted 18-24" apart. Color from late Summer through the Fall. Having good circulation between the plants will help reduce the chance of powdery mildew on your plants.
