Greenery- 'Setcreasea'

Setcreasea, commonly referred to as Purple Heart or Purple Queen, is a greenery favorite. Setcreasea produces a vibrant purple foliage with delicate lavender blooms. This tender perennial's semi-trailing and mounding growth habit, heat tolerance and vivid colors makes this a great choice for landscape and mass plantings! Its colors will come to life through early Spring, Summer and Fall, right up until the first frost while producing small lavender blooms in summer. Setcreasea is desired most for its vivid foliage, rapid vigorous growth, heat tolerance, low maintenance, and semi-trailing mounding growth habit for landscape and beds. Setcreasea is great for early Spring through Fall with vibrant colors to brighten up any container or landscape. Rhoeo prefers full sun with it showing its most vibrant colors in the Summer months. It matures to about 8-12" tall and about 16-30" wide. It grows best in moist, well drained soil. Setcreasea will need regular watering when it is first planted and establishing itself.
