Vinca - 'Cora'

Vinca Cora has a patented resistance to Aerial Phytophthora, which is a common disease that affects other non-resistant Vinca. Simply put, the Cora series will thrive and grow strong in areas where other Vinca series will die!

Vinca Cora is great for beds, borders and mass planting or containers. They can provide the landscape with huge flowers on glossy green foliage. They are robust plants that have a uniform flowering habit. They produce bouquets or carpets of flat blooms with great foliage in shades of white, red, pink, purple, lavender and peach. Cora Vinca prefers full sun and average, well draining soil to promote root vigor. Do not over-water! Coras thrive in heat and humidity of summer climates in full sun. Mix and match several complimentary Coras together for a great looking bed!

We offer Cora Vinca in Apricot, Lavender, Mix, Pink, Punch, Red, Violet and White!

Plant it Here!

- Beds
- Border
- Container
- Edging
- Ground Cover
- Mass Planting
- Rock
- Woodland Edge

Extra! Extra!

- Has a patented resistance to Aerial Phytophthora
- Some have "eyes" and some don't
- Plant with Dusty Miller, Salvia or grasses
- Pinch back for fuller appearance
