SEDAN FLORAL GROWN SAFE™

LEMON BASIL

Lemon Basil is an herb grown primarily for its strong lemon scent. It grows 7-15" tall with white flowers in late summer to early fall. It is a bushy plant with ovate, glossy, bright green leaves often with toothed edged 2" long pointed lemon-scented leaves. The leaves are similar to other basil leaves but tend to be narrower. Full sun and regular watering is recommended for healthy plants. It is actually quite hardy for an annual. Flavor will be at risk if not given any fertilizer. The only pointer to remember about watering is it should be watered whenever the topmost part of the soil is dry. At this time the plant will wilt but will be back to normal once watered. Basil should never reach flowering during the harvesting periods. If given a chance to flower, its flavor will be sacrificed and the leaves become smaller and rather leathery. Once the flower clusters form, they should be removed so that the plant will continue its vegetative growth, harvesting once a week for each plant will make it bushy due to the side shoots that will develop.

Where to Plant

- Border or Bed
- Container
- Edging
- Focal Point
- Fragrant
- Great Foliage
- Ground Cover
- Mass Planting

Cuisine

- Chinese
- Italian
- Thai
- Vietnamese

Complimentary Foods

- | | | |
|-----------|--------------|---------------|
| Cheese | Pasta Sauces | Soups |
| Chicken | Pesto | Sweet peppers |
| Duck | Pimientos | Tomatoes |
| Eggplant | Pizza | Turtle Soup |
| Fish | Pork | Veal |
| Lamb | Potatoes | Vegetables |
| Olive Oil | Rabbit | Vinegars |
| Onions | Shellfish | Zucchini |

Flavor Pals

- Cilantro
- Garlic
- Mint
- Olive Oil
- Oregano
- Parsley
- Saffron
- Thyme
