Indian Dunes

Wilhelm Langguth

Catalina

## Geranium— 'Specialty'

The Geranium Brocade is a specialty geranium treasured for its unique foliage and excellent weather tolerance. This is a great annual for Spring, Summer, and Fall. Geranium Brocades produce large bundles of pretty blooms that extend above the striking foliage. With the Brocade's clumping habit and variegated foliage, this regal plant is attractive in any bed, container, landscape and baskets. The Geranium Brocade is considered to be drought resistant although it prefers full sun and a bit milder climates. It matures to about 12-14" tall and about 10-14" in wide and prefers average, well-drained soil. Trimming back dead blossoms will help to encourage new blooms. Please remember, containers aren't as drought resistant, they may need a little extra TLC and consistent watering if in containers!

Catalina is a striking plant with green and silvery white foliage and produces vibrant pink blooms. Indian Dunes has warm colored foliage of green and bronze and produces deep coral blooms. Wilhelm Langguth has classy green and white foliage and produces rich red blooms.

### Plant it Here!

Border
