## Dorotheanthus - 'Mezoo'

Dorotheanthus Mezoo Trailing red is a succulent that has glossy green leaves occasionally tipped with white. Mezoo produces dainty red daisy-like blooms amongst its beautiful foliage. Commonly referred to simply as Mezoo. Mezoo's mounding and trailing habit will produce many delicate red blooms for your Spring, Summer and Fall beds and containers while maintaining its gorgeous foliage. These beauties will grow up to 6-8" but will spread to about 8-10" wide. Mezoo prefers full sun but will handle a little shade just fine too. Mezoo is considered drought tolerant, but may need a little extra TLC and water in the hottest Summer months. Soil should be moist but well drained. These are exceptionally lovely in containers, hanging baskets or as a trailing edge with other plants blended with it.
