## Coleus - 'Sun'

Coleus produces a variety of boldly colored foliage, ranging from green, yellow, orange, rust, reds, bronze and purple. The upright growth habit, heat tolerance and vivid colors makes this a great choice for landscape, baskets and mixed containers! Its colors will come to life through early Spring, Summer and Fall, right up until the first frost. Coleus is desired most for its vivid foliage, fast, vigorous growth, heat tolerance, and upright growth habit for landscape, beds, baskets and containers. This is a great annual for early Spring through Fall with vibrant colors to brighten up any container or landscape. The Coleus prefers full sun but can tolerate some shade. They mature to about 18-24" tall and about 12-18" wide. Coleus grows best in average, well drained soil. Please remember, plants may need a little extra TLC and more consistent watering when in a container or basket!

The Coleus Sun series is available in Alabama Sunset, Defiance, Rustic Orange, Tiny Toes, and Solar Sunrise.
