Bracteantha - 'Dreamtime'

Commonly referred to as "Strawflower", this beauty can handle the cool Spring, Fall, light frost, and still manage to handle the heat of Summer with grace and beauty. Its cheerful, sunshiny blooms can brighten any day. The compact, upright habit of the Bracteantha is particularly desirable in baskets and containers. The Bracteantha will mature at approximately 14" and be nearly as wide, spreading 10-12". Strawflowers like full sun and well drained soil.

With its large, showy blooms, this is a summer favorite for containers and baskets! Just remember, plants aren't as "drought tolerant" in baskets and containers!
