Pansy - Matrix 'Ocean Improved'

Matrix Ocean Improved sports a light blue flower with a dark blotch. The Matrix series was grown with tight specifications while minimizing waste. Matrix has superior branching, meaning the plants entirely cover the soil before they flower to prevent stretching.

Quite possibly the most popular and recognizable fall annual, pansies come in a wide variety of shapes and sizes. The flower size of pansies ranges from 2½" to 4" depending on the type. They are compact low-growers, making them ideal for edging.

Plant them in well-prepared sunny to partly shady beds, making sure they get at least 3 hours of sun each day. Make sure you leave the crown of leaves above the soil because planting them too deeply can lead to root rot. They grow best in a loose, rich soil with regular water.

Don't over-water or they will begin to look disheveled. These colorful plants are far from high-maintenance, but as with most bedding plants, they may require a little TLC to add a gorgeous touch to your garden.
