## Scaevola - 'Bombay'

Commonly referred to as the Fan Plant. The Scaevola produces green foliage and adorns itself with fan shaped blooms. The consistent semi-trailing growth habit and lovely blooms makes this a great choice for landscape, baskets and containers! Its blooms are scattered among the foliage and bloom through early Spring, Summer, and Fall. Scaevola is desired most for its ever-blooming blossoms, low maintenance, heat tolerance, drought tolerance, and trailing growth habit for landscape, beds, baskets and containers. This is a great annual for early Spring, Mother's Day, Summer and Fall. The Scaevola prefers full sun but can tolerate some shade. They mature to about 12-16" tall and about 30-36" wide. The Scaevola grows best in average, well drained soil. Please remember, this lovely may need a little extra TLC and more consistent watering when in a container or basket!

Scaevola is available in Bombay Dark Blue, Bombay Lavender, Bombay Pink and Bombay White .
