Marigold - 'African Inca'

In vibrant shades of yellow and orange, African Inca Marigolds are an excellent Spring and Summer annual that require little maintenance, yielding lots of color.

Incas produce compact plants with large double blooms that appear continuously all summer long until frost. Your garden will showcase masses of large fluffy 3 - 3½" blooms in bright sunny colors. They will brighten any sunny bed or add spunk to any container. Inca African marigolds require full sun (at least 6 hours a day) and regular water. They prefer average, well drained soil and should be watered two to three times per week. Deadheading these beauties will help to promote and prolong more blooms! Bold color and easy maintenance makes this a favorite for any bed, border, landscape or container! The original Inca was America's favorite marigold, and this improved version is even better!
