Red Cayenne Pepper

This thin, 5-6" long, pointed pepper is very hot. It is excellent fresh, in sauces, or dried and ground into powder for a spicy condiment.

After harvest, you can string your cayenne peppers to dry and they will last throughout the year, great for home décor!

Harvest Instructions

Harvest when they are between four and six inches long. The color will also have started to change from green to red. The color of the pepper determines how hot it will be.

You should also avoid touching your eyes or mouth when harvesting
