## Grasses - 'Fountain Grass'

Pennisetum is commonly referred to as Fountain Grass.

It grows in thick, dense clumps with leaves springing up in a lush green foliage. It can grow up to 36" tall and 36" wide at its maturity. Its mounding habit produces soft foxtail blooms that billow in the wind. The Fountain Grass is an exceptional addition to beds, containers and landscape. It adds height and color while being non-invasive.

The Rubrum Pennisetum, known as Purple Fountain Grass, grows a bit taller, reaching up to heights of 42". The same mounding habit, but produces lovely purple foliage and purple blooms. A great contrast and eye catching grass for all of your beds, containers, and landscape.

Both of these grasses are beautiful as a backdrop for smaller bedding plants in a sunny garden spot. They prefer full sun and tolerate drought conditions. They prefer sandy to normal soil, well drained. Perfect in large areas!

### Plant it Here!

- Borders
- Landscape
- Containers
- Anywhere you want bold substance and color

### Extra! Extra!

- Perfect for Spring, Summer and Fall landscape
- Tall warm foliage to frame beds and containers
- Heat and light tolerant
- Prefers sandy soil, so keep well drained in normal soil!
- Bold color in large area works best
