## Gerbera Daisy - 'Jaguar'

The Gerbera Jaguar Daisy produces a deep green foliage and up to 5 blooms at a time on each plant. The compact growing habit and early blooms makes this a fantastic choice for bringing in the Spring! The cheery blooms are approximately 3-4" wide and extend above the foliage on short thick stems. These daisies are desired most for their bright colors, nearly double row blooms in containers, baskets and in cut arrangements. This is a great annual for Spring, Summer, and Fall. The Gerbera Jaguar prefers full sun to partial shade. It matures to about 8-12" tall and about 6-8" wide and prefers average, moist but well-drained soil. Trimming back dead blossoms encourages new blooms. Please remember, they may need a little extra TLC and more consistent watering if in containers!

Gerbera Daisy is available in White, Deep Rose, Yellow, Deep Orange, Red and Salmon Pastels.
